BLONDINE Beer: pure as a diamond - combining natural ingredients and an exotic touch, BLONDINE Beer tempts the senses - fresh, lively, herbal, yet always elegant; ideal as an apertif or welcome drink.

BRUNETTE Beer: Equally pleasing in it's own right, BRUNETTE's characteristic strength and spice offer the connoisseur a shade of ebony and a thrilling malt sensation; ideal to complement a dessert.

BLONDINE & BRUNETTE BEER are quality refreshments with class!

Excellence Taste for demanding connoisseurs

- * We understand the nuances of exquisite taste and recognize that our customers are looking for something unique. To be the first to discover something special is a common challenge - for the host to offer their guests or for the guest to bring as a gift - something which will please and excite it's recipient at the same time.
- * What makes BLONDINE & BRUNETTE BEER so special is that it is brewed with an open fermentation process using a sparkling wine yeast grown exclusively for BLONDINE & BRUNETTE BEER at the Weihenstephan University in Bavaria. The yeast is grown using only the purest Bavarian springwater, all-natural ingredients, and finest hops in Germany. Differentiating our selection from beer brewed with conventional/traditional beer yeast.
- * By using nature's finest ingredients, the beer maintains a refreshing and **fruity accent** that is classic and one-of-a-kind. Compared to other products, little carbonation in both the light and dark variations yields a subtle but **harmonious and delightful treat to your senses**.
- * Embodied in premium 0,33 l champagne-flasks, BLONDINE & BRUNETTE BEER are presented in the high quality packaging they rightfully deserve. Limited edition Magnum and Double-Magnum flasks as well as wooden gift-box crates are available.

Highest quality compliant with the Bavarian brewing law for purity

- * An alcohol content of 5,8 % has been defined with purpose and intent to reflect quality.
- * The content has a **shelf-life of 2 years** after the flask is filled.
- * These products are the result of the German, **specifically the Bavarian brewery trade and process**, offering pure and natural products - setting us apart from craft-beer hype. The result of this artistic process originates in a small private brewery near Lake Chiemsee/Bavaria
- * The flasks can be cooled in ice-buckets without damage to the **label**, thanks to the **screen printing process** conducted directly on the flask. Just one of the multiple benefits of such a fine quality product that your guests and you as a host can appreciate.
- * **Made with talent, time, and precision**, these are not mass-produced products available anywhere or anytime. Our beer is brewed in **small portions** and thus, could require additional time to complete an order. The yeast cultures often require additional time and patience to ensure that the flavors unite to achieve the highest quality products you will grow to expect.

Matured over time, brewed with love, BLONDINE & BRUNETTE BEER represent highest quality.
